## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 11-21 are allowable over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

As per the independent claims, the claim recitations pertaining to the a selector connected to said plurality of modules, which routes an input signal to at least one of the modules while excluding the input signal from another of the modules, is not explicitly taught by the prior art of record. Vysotsky et al teaches the input signal being supplied to all of the speech recognition units, and depending on the output signals, the arbitrator of the system identifies the best recognition result. The selector according to the invention, has a different task, namely to route the input signal (not the output signal) to one of the recognition modules while excluding the input signal from another of the modules. Furthermore, Vysotsky et al. does not suggest a plurality of speech output modules being capable of outputting oral speech, the speech output modules being for respectively different types of speech output. The data processing performed in Vysotsky et al. is not capable of outputting oral speech. Further, there are not a plurality of modules for respectively different types of speech output. Watts teaches selection of a speech processor, but are configured randomly depending on the last incoming call routed to the processors. The destination speech processor is likely not the most appropriate speech processor.

Art Unit: 2626

Furthermore, it would not have been obvious to one of ordinary skill in the art of speech signal processing to modify the teachings of the prior art of record to obtain the recited claim limitations of the independent claims as noted above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
